WALKWAY PROPOSAL

This concept provides a simple and innovative solution for the much-needed accessway from northern Broadway to Newmarket's main station concourse. Commuters would be able to access the western line/ CRL and the Southern and Eastern lines without the need to walk the additional 300m south along Broadway to the narrow alleyway that connects Broadway to Station Square.

NEWMARKET.

FACADE PROPOSAL

The proposed, and much needed, northern entranceway to the Newmarket Train Station situated on the existing railway overbridge. This will allow AT to clearly promote the presence of the station, something which has been lacking on Broadway since the station opened.
